

## Custom Welded Bellows

Aerosun-Futai provides also the custom bellows and assemblies to meet the needs of each one of our customers. The minimum information should be considered to develop an optimal bellows design and engineered proposal. Such as:

- Min. ID
- Max. OD
- Material specification
- Vacuum leakage rate requirements
- Working temperature
- Movements (axial compress and extension)
- Life cycles
- Spring rate if required
- Media conveyed
- Overall length
- Convolution configuration
- Specified quantity
- Test requirements if known

Convolution Configurations
